

'Hot Topics' Out of Hours & Urgent Care Course

Saturday 7th November 2015

NB Medical is delighted to be working with **Aneurin Bevan Health Board** to run an **Out of Hours & Urgent Care** course on Saturday 7th November 2015.

For 15 years, NB Medical Education has been the market leader in running GP Update courses in the UK, with over 10,000 GP's attending our "Hot Topics" courses per year. We now offer an OOH course, tailored specifically to the needs of Out of Hours doctors and nurse practitioners.

Out of Hours and Unscheduled primary care providers are the unsung heroes of the NHS and this course will make it easier for you to provide high quality, evidence-based OOH care. It will also make you feel good about the incredible job you do, motivate and inspire you.

"Excellent as always - as I now expect from NB Medical!"
Delegate on our OOH Course in London

Our teaching is focused on the patient, the problems they bring us and how best we can help them. During this one day course we will cover the most important and 'not to miss' conditions seen in OOH care including:

- The latest evidence on the management of the **acute conditions** most commonly seen 'out of hours'
- **Serious & challenging problems** seen in OOH care e.g. end of life care, psychiatric emergencies
- The evidence around telephone advice and introducing a new model for safe, effective and efficient **telephone consulting**
- **Risk management:** common pitfalls and errors, and how to avoid them

The '**Out of Hours**' course consists of a series of short 'Ted-style' engaging presentations blending evidence and cases, followed by discussion which may have an impact on your practice. The course comes with a number of extra resources to give it incredible 'added value'

- NB** Delegates will receive a special '**Out of Hours**' **course book** that will also be available in electronic format and include KISS (evidence-based *keep it simple summaries*) for all the conditions commonly seen OOH, so that OOH doctors have the resource to rapidly find evidence-based answers to clinical problems seen in OOH care. All of the material is up to date and the material is completely **100% independent from any external influence.**
- NB** 12 months access to the on-line electronic version of the book which is instantly searchable. All the original references and resources for GPs (e.g. links to on-line clinical calculators) and patients (e.g. patient information leaflets) are hyperlinked and just one click away.
- NB** **NEW** A CPD tracker with which you can track your CPD, including external CPD and your work with the book. At the end of the year with just one click it will collate all of this into a single pdf summary for your appraisal

Continuing Professional Development with NB Medical

Each delegate will be presented with a certificate of attendance awarding 6 CPD credits for a full day course. The **'Out of Hours'** course is accredited by the Royal College of General Practitioners. On accrediting the course the RCGP assessor commented that:-

"OOH care is a topical issue in relation to clinical and educational supervision of trainees."

"This course is a high quality educational activity relevant to the continual professional development of GPs."

Feedback from our recent Out of Hours courses

- *'The best one day course I have been on'*
- *'I thoroughly enjoyed this session which was done with humour, as well as honing the serious points. I would recommend this to any of my health care colleagues'*
- *'Excellent course, thank you so much for doing this. I did an OOH shift the day after the course and it really improved my confidence and motivation to do the best I could for every patient, based on the latest evidence'*
- *'Excellent course, felt enthused afterwards'*
